Evolution

I.PART: the need for innovation to be recognized as a value creation

- 2005 (Poslovni ritmi, TV Show) needed to create a market for innovation; promotion of innovation and enterpreneurship;
- 2005 Fall meeting at Stanford InJo as a concept introduced to VB;
- 2006- 2007 promotion of InJo as an active participant of an innovative society to Slovenian media;
- 2008 InCo brand; InCo model as an horizontal platform for innovative ecosystems; Manifesto 2008; Inco model
- 2009 InCo/InJo fulfilled its mission innovation became an important topic in Slovenian media; all InCo model participants have been addressed and reconnected; Manifesto 2009
- II. PART: a need for civil initiatives as a proactive part in the creation of open innovation ecosystems
- 2010 InCo moves into the infrastructure for testing new innovation ecosystems models and processes (leadership, organisations, co-operation and co-creation)

How it happened

- A genuine need, and a project that created a value for that need
- Vibacom's people, customers and networks
- Violeta's passion and beliefs and personal networks
- Great partners, members, sponsors, friends
- Great results at every stage of InCo evolution
- Slovenian uniqueness and core competences on participation, collaboration
- Many NGOs and civil initiatives for an open society
- Global trends and weak indicators
- The energy that is with us today

What have we learnt

- Leadership from within requires a high level of self-discipline, internal strength and constant reinforcement of key values
- Participants largely, still need to be lead from top down or from the "front rows"

The call: personal growth is our own responsibility! The future of leadership is to energise the grid.

 Increased emphasis of the importance, and the role of innovation in social and economic development in public media

The call: journalists, require specific training and education and with critical but professional stance, help to create success in society

 In business, the understanding of innovation is still in most cases limited to a group of developers and marketing

The call: managers, leaders start innovating; organisational innovations create much larger value than product innovations The current ecosystem is lacking experience and understanding of the importance of communication and co-creation

The call: create your own methods, models, way of creation

• Creation and innovation are still not strongly represented in our educational system

The call: teachers learn how to communicate and connect. Create conditions where individual talents and competence can be recognised and connected for a higher good.

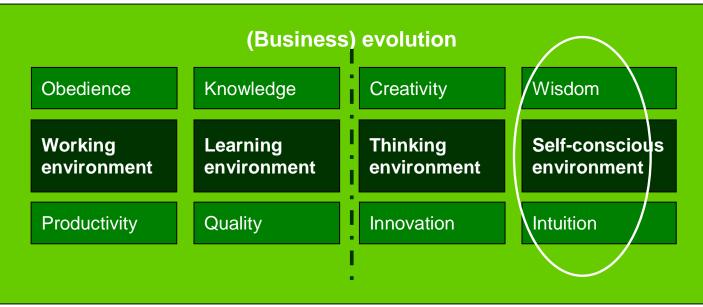

• More and more people are aware of the importance of cross-structural and cross-hierarchical co-operation and thus - co-creation.

The call: The more we are connected the more we are free!

35

Where to go next

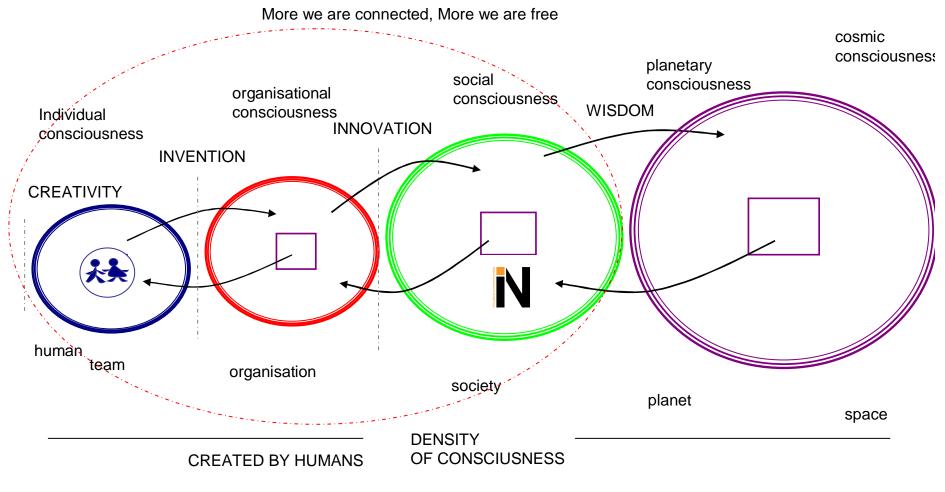

- InCo an infrastructure for testing new open innovation ecosystems models and processes (leadership with-in, dynamic structures, innovative services and solutions, models for co-operation and cocreation; new models for internationalisation, etc.)
- Self- consciousness environment, movements, civil initiatives, open innovation ecosystems

*intelectual property of Vibacom d.o.o.

Where to go next

Model Of Sustainable Cohesion (MSC)
